

Retail Services

Retail Services

CSL was originally setup to provide HVAC control servicing and support to one of the UK's largest retail chains. Retail services are in our blood and subsequently CSL operate a dedicated retail services department.

Our dedicated team of engineers have extensive knowledge of retail systems and our Technical Director alone has over 40 years' experience of Tesco HVAC control systems.

CSL have been working on Tesco stores since our inception over 21 years ago where we have been actively involved in the maintenance, and more recently, completed numerous BEMS upgrades and refreshes.

More recently CSL have also become an approved Sainsbury's BEMS specialist contractor and are undertaking multiple BEMS projects across a number of Sainsbury's stores.

It's not just two of the largest retailers on our list of retail customers either; we have also completed works on a number of smaller retail stores. ◆

"Combined Services have worked alongside us on number of BMS projects for one of the UK's largest supermarket chains, and remain to be our first choice BMS specialist.

Combined Services always deliver and recently went the extra mile to ensure our clients BMS system was designed, commissioned and handed over in an extremely short period of time. Their can do and professional attitude is a credit to them"

David Upton - EIC Ltd

Retail Services

Example Projects

Store Refreshes & Cold Store Projects

CSL were appointed directly by Tesco in 2014 to upgrade the BMS systems in 44 stores. The project involved replacing over 350 controllers across the Tesco estate and included survey visits, electrical installation, software creation, on site commission, store hand over and remote access verification.

Sensor Calibration & Communications Project

CSL's past experience and extensive knowledge of Tesco stores BMS systems made us the obvious partner to work alongside Tesco's machine management contractor, on a recent project across more than 900 stores.

The project included calibrating all sales floor sensors and ensuring the remote communications via the BMS bureau were functioning. CSL's involvement included both investigative and remedial works on existing BMS systems, and a number of BMS upgrades. CSL also acted as the BMS specialist for the entire project and provided both consultancy and training to the machine management provider, for which CSL won the BCIA "Construction to Training" award in 2012.

Store Refreshes & Cold Store Projects

CSL have been involved in numerous retail projects including store refresh programs as well as hot and cold store projects. These projects range from a single day onsite to troubleshoot BMS issues to full BMS upgrades comprising of new MCC control panels and all BMS controllers on site. CSL often work for the end client directly or via a network of mechanical contractors
